

COMERIO ERCOLE

QUALITY & TECHNOLOGY SINCE 1885 ITALY

INFO NEWS

Volume 2024 - Ed.05

IN BREVE Il mese di Maggio è stato molto intenso per quanto riguarda la nostra partecipazione alle fiere in America, con eventi significativi come **ITEC** e **NPE**, rispettivamente nel campo della gomma e della plastica. Grandissima affluenza nei nostri stand, ricevendo moltissimo interesse dalle persone che ci hanno visitato e che ringraziamo per l'opportunità di incontro. È stata un'esperienza che ci ha permesso di presentare le nostre innovazioni e di instaurare nuovi contatti con professionisti, del settore soprattutto del continente americano ma anche provenienti da tutto il mondo.

ITEC2024 – USA We also had the opportunity to participate in the ITEC fair in Akron, Ohio, which is the largest tire manufacturing trade show and conference in North America, dedicated exclusively to tire makers and those serving the industry. ITEC is renowned for bringing together exhibitors who offer practical experience and solutions. Attendees, including decision-makers and technical professionals from around the world, gain valuable insights both on the exhibit floor and in the conference rooms. The event is well-known for attracting a high percentage of attendees who are responsible for purchasing decisions, as well as technical experts who influence those decisions. As **COMERIO ERCOLE**, we could not miss the opportunity to participate and present our innovations to the visitors: our Alessio Ceriani, Sales Manager, and Marco Putignano, Process Officer/R&D Manager, had the chance to expand business network and showcase our latest advancements in the industry to the public. We would like to extend our thanks to everyone who visited our booth. Your interest and support are greatly appreciated!

What was never considered possible is now possible!

NPE2024 - USA. This year, **COMERIO ERCOLE** participated once again in the **NPE** trade fair at the Orange County Convention Center in Orlando, Florida, after a three-year hiatus since the last edition. This event is designed to help organizations leverage innovations, drive significant business growth and build a more sustainable economy. **NPE** showcases the latest advancements in plastics, materials, and manufacturing solutions, all in one location. **NPE2024** is intentionally crafted for leaders who want to understand the next big ideas, build meaningful partnerships and accelerate business growth. **COMERIO ERCOLE's** team, composed of Alessio Ceriani, Sales Manager, and Marco Putignano, Process Officer/R&D Manager, had the opportunity to deepen their knowledge on plastics and network with numerous industry professionals. It was a highly rewarding and dynamic edition, and we hope to continue showcasing our innovations and improving our offerings. Thank you to everyone who visited our stand and engaged with us. We look forward to the next challenge and opportunity to connect and collaborate on future advancements in the plastics industry as well as for rubber field also!

STAY TUNED WITH US www.COMERCOLE.IT info@comercole.it
