

COMERIO ERCOLE

QUALITY & TECHNOLOGY SINCE 1885 ITALY

INFO NEWS

Volume 2024 - Ed.10

IN BREVE: Siamo orgogliosi di condividere con tutti voi i due importanti riconoscimenti: TOP 100 ESG Excellence e TOP 75 ESG Performance ottenuti dalla **COMERIO ERCOLE** presso la prestigiosa sede di Borsa Italiana a Milano il 21/10. Il riconoscimento, ideato da Kon Group e promosso con ELITE e Azimut, vuole essere un omaggio a quelle realtà che si sono distinte per aver condotto le proprie scelte aziendali in una ottica di Sostenibilità ESG. **COMERIO ERCOLE** è stata premiata con uno specifico ESG Rating, emesso da ALTIS Alta Scuola Impresa e Società dell'Università Cattolica del Sacro Cuore, da Kon ET Group e Politecnico di Milano e da Reprisk.

COMERIO ERCOLE is strongly investing in innovation for the future. Automated systems, including automated guided vehicles (AGVs), rail guided vehicles (RGVs), robots, monorail transfers, and conveyors, are increasingly used to move raw materials, compounds, components, green tires, and cured tires from one phase of the process to another. Thanks to **COMERIO ERCOLE**'s new developments, it is now possible to use automated systems directly on the WIND-UP section of RUBBER CALENDER LINES, with two alternative systems available:

- 1) WIND-UP SHUTTLE TYPE WITH AGV and CASSETTES
- 2) WIND-UP SHUTTLE TYPE WITH AUTOMATIC REEL HANDLING (RGV)

The main advantages of the first configuration are that the cassette arrives at the wind-up station fully prepared without any need for manual operations. The AGV automatically unloads the full cassette and loads an empty one outside/inside the wind-up. This is a 100% fully automated process, requiring no operator intervention, with guaranteed safety through an automatic locking/unlocking system for the cassette in the working position. For the second configuration, the main advantages include fully automatic handling of finished reels and textile liners with an integrated solution according to the customer's warehouse layout. Here, the operator only needs to prepare the textile liner in advance, providing significant safety improvements thanks to a fully segregated area during reel movement. **COMERIO ERCOLE** is investing heavily in R&D to lead the transition to an increasingly digital and automated world. The goal is to work toward **Industry 5.0**, where value-oriented and human-centered initiatives align with Industry 4.0 technological transformations to create a more seamless interaction between humans and machines.

What was never considered possible is now possible!

COMERIO ERCOLE is proud to share with all stakeholders two prestigious awards: **TOP 100 ESG Excellence** and **TOP 75 ESG Performance Governance**, received in Milan on October 21 at the distinguished Borsa Italiana venue, presented by the Sustainability Award committee.

This recognition underscores **COMERIO ERCOLE**'s ongoing commitment to addressing climate change challenges and transforming them into opportunities for innovation and sustainable growth. We believe that embracing sustainability is not only a choice but a responsibility to future generations.

The award, created by Kon Group and promoted alongside ELITE and Azimut, celebrates companies that have distinguished themselves by making business decisions with a focus on sustainability. Each recipient was assigned a specific ESG Rating, issued by ALTIS Alta Scuola Impresa e Società di Università Cattolica del Sacro Cuore, Kon ET Group, Politecnico di Milano, and Reprisk.

These awards reinforce our purpose and inspire us to continue driving positive change in our industry. A heartfelt thank you to all **COMERIO ERCOLE** colleagues and partners whose dedication made this achievement possible, further strengthening our commitment to ESG sustainability in the manufacturing industry.
